Press release

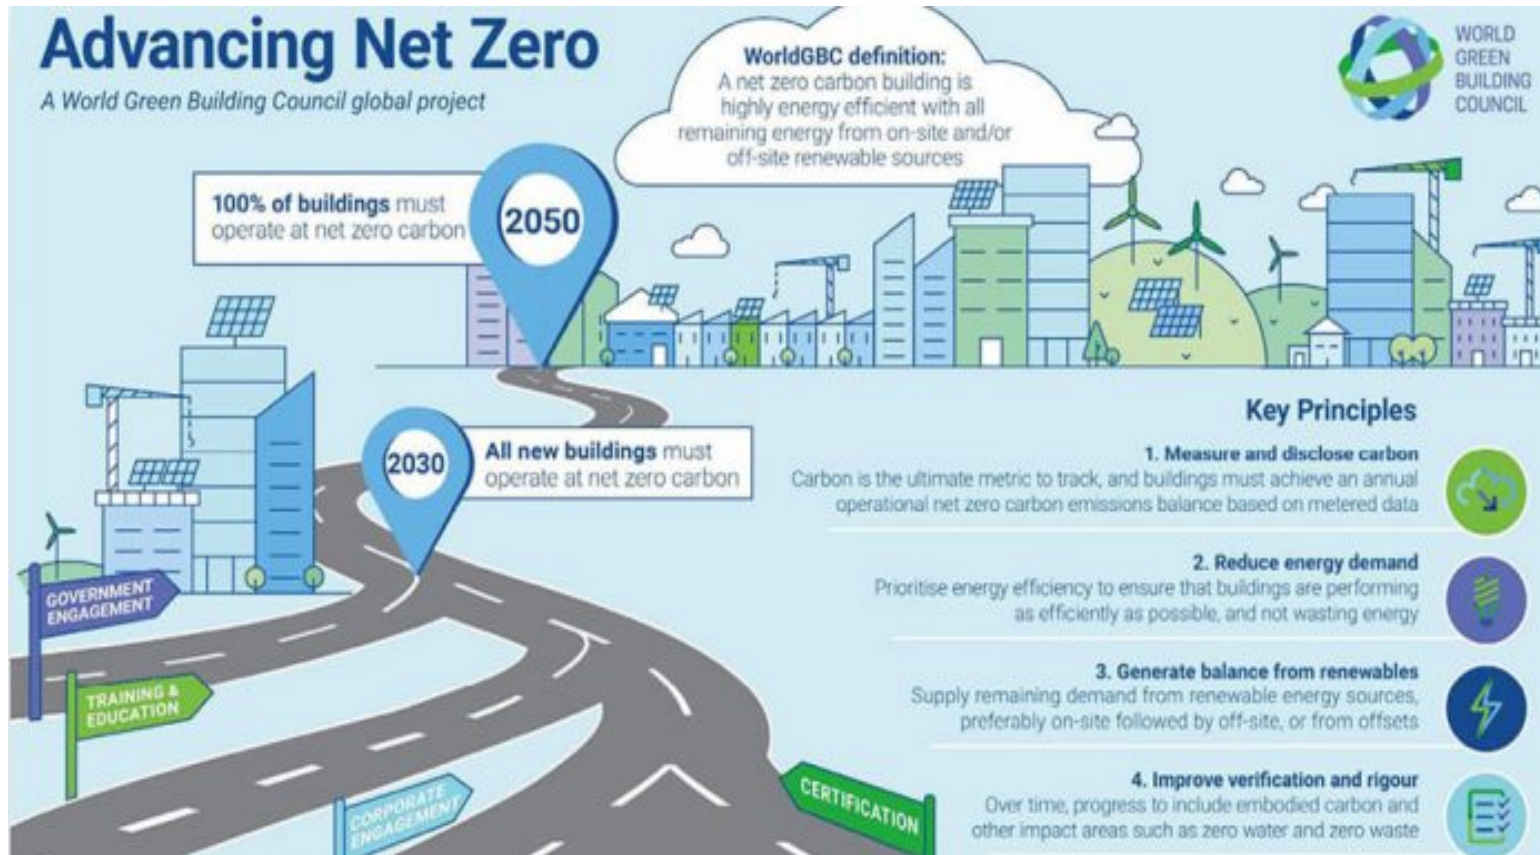

PM Theresa May: we will end UK contribution to climate change by 2050

Legislation laid today puts the UK on the path to become the first major economy to set net zero emissions target in law.

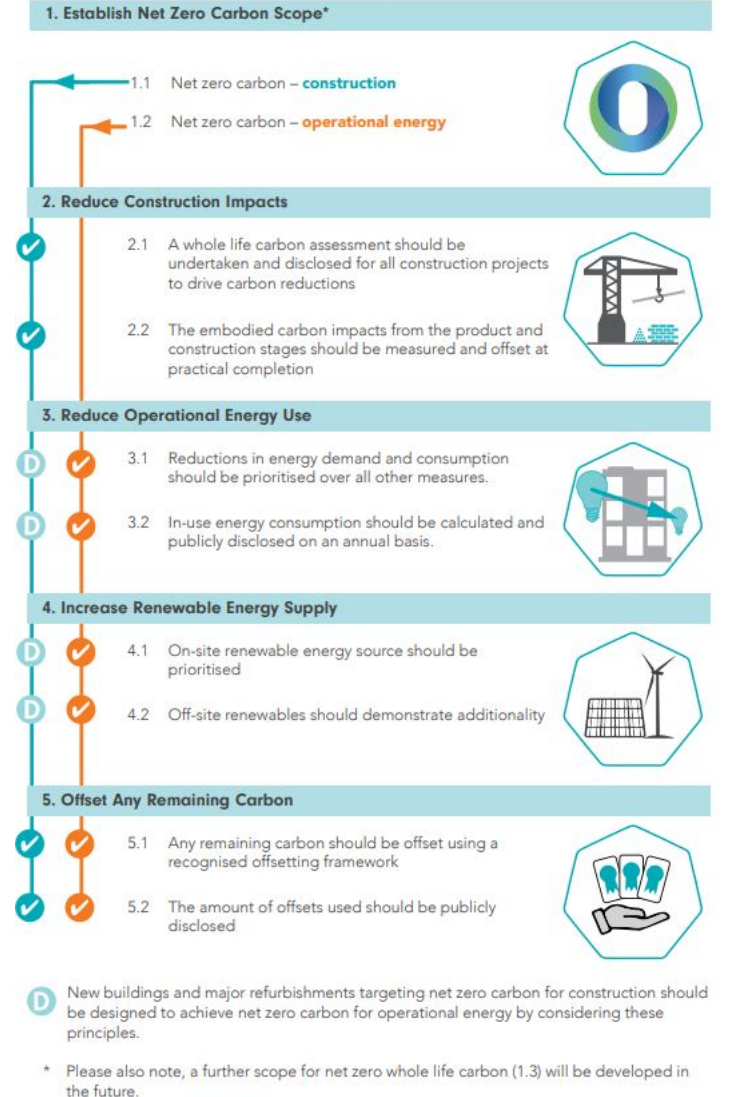

What is Net Zero?

The WorldGBC definition of a net zero carbon building is a building that is highly energy efficient and fully powered from on-site and/or off-site renewable energy sources.

Steps to Achieving a Net Zero Carbon Building

Route maps / Design guides – Net Zero

"We cannot solve our problems with the same thinking we used when we created them."

"Automation applied to an inefficient operation will magnify the inefficiency."

Any organisation that isn't **future literate** becomes **a weapon in defence of the status quo**

Innovation is the culture of asking the right questions

"Increasingly, there are only two kinds of companies: brave and dead."
